environmental

Sign 2000 are an ISO 14001 accredited organisation. This is an internationally recognised environmental standard demonstrating sound environmental practice and green credentials by controlling the impact of a companies activities, product or services on the environment.

We believe structure and process should always be the servant of good and sound business.

We are currently working with and advising a number of leading retail organisations with their carbon reduction policies, this includes recommendation of new technology materials and manufacture processes.

Our internal environmental awareness and practices follow a cascading process from our Managing Director to key Directors and Departmental Managers through to all personnel.

We advise our staff on:

- What we want them to do, but keep change simple.
- Advise on what can be achieved as a whole if all personnel contribute their own small bit.
- Make change in our practices part of our staffs lifestyle and therefore easy to accommodate.
- Aspire staff to make simple adjustments to their day to day behaviour.

We will consistently review and monitor our waste and asset purchases, ie:- Vehicles and plant etc, to ensure we take the most sensible and ethical options in relation to environmental impact, future energy consumption, and emission life cycle costs.

All key material suppliers are engaged with to promote best industry practice and achieve a closed loop recycling policy.

The logo for SIGN 2000, featuring the word "SIGN" in a serif font above the number "2000" in a sans-serif font, both in white on a dark blue background.

overseas service

SIGN
2000

Sign 2000 are members of:

'The Sign Alliance', which is a cooperative group of European Sign Manufacturers, each highly successful within their own regions, providing a fully inclusive service to the entire European region.

This organisation is the first ethical cooperative alliance of its kind promoting in country/regional manufacture working on an information sharing scheme controlled by a central alliance monitoring hub.

These procedures ensure that brand consistency and quality is delivered throughout all regions with the added benefit of local knowledge and minimal logistics.

Local knowledge is the key to the successful delivery of any European project.
